Attention

Nettoyage & Entretien

Enlevez les déchets régulièrement afin d'éviter le blocage de la fuite . En général ,vous pouvez nettoyer la paroi de douche par serpillière avec des détergents doux.

Veuillez ne pas nettoyer la paroi de douche avec les détergents forts comme l'alcool ,l'essence ou autres nettoyeurs chimiques.

S'il y a des taches sur la paroi, vous pourriez la nettoyer par un calicot avec dentifrice, cependant , vous la nettoieriez à l'eau après.

Lorsque vous finissez l'installation et pivotez la porte ,s'il y a du bruit ,vous pouvez appliquer un peu lubrifiant sur des rouleaux, charnières et la glissière.
